Understanding Making Connections in Reading Comprehension

Making connections is a metacognitive strategy that involves linking new information to what learners already know. This process helps students comprehend, remember, and apply what they have learned more effectively. There are three primary types of connections:

1. Text-to-Self Connections

These occur when learners relate the current reading to other texts they have read. For instance, comparing themes or characters across different books.

3. Text-to-World Connections

These involve connecting the content to broader real-world issues, events, or knowledge about the world. For example, relating a story about environmental conservation to current news about climate change.
